

Play Guitar Hits - Pairing Fret Zealot

Updated September 18, 2020

Play Guitar Hits is an app for [iOS](#) devices. It is compatible with Fret Zealot for displaying tabs for a wide range of songs and riffs, with granular controls to learn at your own pace

In the Play Guitar Hits app, select a song you would like to play from the interface, then select which 'part' of the song you would like to play. Once the video screen is displayed, select the 'settings' option from the right side, and Scroll down to the 'Fret Zealot' section.

Power on your Fret Zealot and press the toggle to begin scanning. Once a Fret Zealot is connected, you will see a 'Tablature' option appear. Press this to enable to Fret Zealot data feed, and begin displaying chords and tabs on the fretboard.
