

# Chord! - Pairing Fret Zealot

Updated October 10, 2020

Chord! is an app for [iOS](#) devices. It is compatible with Fret Zealot for displaying chords, scales, and much more. Explore music theory, discover scale harmonies, and a huge selection of chord voicings and arpeggios in any tuning.

In the Chord! app, select the 'Settings' screen, and Scroll down to the 'Fret Zealot' section. Power on your Fret Zealot and press the toggle to begin scanning. Once a Fret Zealot is connected, you will see this indicated on the screen.

You have several options for displaying notes and chords on the Fret Zealot, and the default selections are perfect for any stage player. In the app, any place where you see fretboard fingerings ( scales, chords, arpeggios), the Fret Zealot will also display this data.
